scenario id	scenario	test steps	test input	expected results	actual result	status	comments										
Scenario ID	**Scenario**	**Test Steps**	**Test Input**	**Expected Results**	**Actual Results**	**Status**	**Comments**										
a1	Change Instagram username	1. Open Instagram profile settings2. Open the Username field3. Enter a new username4. Attempt to save the username	New username: lotsbhyfugughvgZgugugigiBg7g	The entered username should be accepted when it contains only permitted letters and numbers.	The system displays: "Usernames can only use letters, numbers, underscores and periods."	Fail	The entered value appears to contain letters and numbers only, but the system still displays a username-format validation message. Username validation should be checked.										
a2	Connect WhatsApp Business account	1. Open the WhatsApp Business connection option2. Select India (+91)3. Enter the phone number4. Attempt to send the verification code	Country: India (+91); Phone number entered in the screenshot	The system should validate the phone number and, when valid, send a verification code. If invalid, it should show a clear validation message.	A "Something Went Wrong" message appears: "Phone number isn't working. Please try again." The Send Code action is not completed.	Fail	The error message is generic. The system should provide a clearer reason when the entered phone number is invalid or unsupported.										
a3	Edit profile banner	1. Open Banners2. Select the profile banner text field3. Enter banner text4. Check the character counter	20-character banner text containing symbols	The banner should accept text within the allowed character limit and show the correct character count.	The banner field accepts the entered text and displays 20/20 characters. The Save button is available.	Pass	The screenshot shows the maximum 20-character limit being reached without a validation error.										
a4	Edit profile bio	1. Open the Bio section2. Enter text in the bio field3. Check the character counter4. Attempt to save the bio	Bio text at the 150-character limit	The bio should allow text up to the stated 150-character limit and display the correct character count.	The bio field displays 150/150 characters and no character-limit error is shown.	Pass	The screenshot confirms the 150-character limit is reached successfully.
